

Cybersecurity & Privacy Self-Learning Program

Get ready to protect your healthcare organization like never before with Shield! Our Mainpro® accredited cybersecurity & privacy program has been designed to cater to the unique requirements of Canadian healthcare professionals.

What You'll Get

A user-friendly, web-based curriculum that is expertly managed and updated by our team with the most current evidence-based information.

This program has been certified for up to 3 Mainpro+® credits. Earn up to 12.5 certified Mainpro+® credits!, with an additional 4 credits available under the Royal College Maintenance of Certification.

An understanding of your individual and organizational readiness to recognize and prevent costly breaches.

Flexibility at your fingertips! Each module takes just 30 minutes and you can start, pause, and resume anytime—perfect for your busy schedule

Did You Know?

Research shows that cybercriminals count on human interaction in the majority of their attacks, so your best defense against a harmful breach is you and your team.

Equip yourselves with the most powerful weapon: knowledge.

Shield is powered by Amplify Care. Learn more about all our services and digital health supports at www.amplifycare.com

Cybersecurity & Privacy Self-Learning Program

Cyber threats are evolving—so should we. Shield empowers healthcare teams with practical, bite-sized learning designed to turn everyday actions into powerful defenses. From mastering safe habits to tackling phishing head-on, these modules give you the confidence to protect your patients, your data, and your organization.

Modules

Cybersecurity Core Modules:

1. **Introduction to Cybersecurity in Healthcare** – Understand why healthcare is a prime target and the basics of cyber defense.
2. **Safe Cybersecurity Habits** – Learn everyday practices to keep systems and data secure.
3. **Password Security** – Create strong passwords and manage them effectively.
4. **Clinical Cyber Hygiene** – Protect clinical systems and patient information from breaches.
5. **A Deep Dive into Phishing** – Spot and stop phishing attempts before they succeed.
6. **Artificial Intelligence In Healthcare** - Discover how artificial intelligence is transforming healthcare

Privacy Modules

1. **Managing a Breach** – Know what to do when an incident occurs.
2. **Personal Health Information Obligations** – Understand your responsibilities under privacy laws.
3. **Email and Personal Health Information** – Secure communication practices.
4. **Privacy and the Right to Access Personal Health Information** – Learn patient rights and compliance

Supplementary Modules

1. **Social Media for Healthcare Professionals** – Navigate social platforms safely
2. **Privacy Officer Fundamentals – Part 1 & 2** - Gain the knowledge and skills to manage privacy compliance, protect personal health information, and respond effectively to breaches
